

# ASSISTING THE GOVERNANCE AND RECOVERY AGENDA FOR DONBAS

## PROJECT DESCRIPTION

The ongoing conflict in eastern Ukraine has had a negative impact on economy, social cohesion, resilience, community security and the rule of law. To contribute to efforts to address this, ACTED and IMPACT are implementing this project aimed at enhancing local capacities for evidence based planning and improve local decision making. This will be achieved through: improving access to quality information for local planning and strengthening capacities of local authorities for evidence-based planning. Key project components are:

- economic recovery and restoration of critical infrastructure
- local governance and decentralisation reform
- community security and social cohesion
- stakeholder mobilization and assessment design

Ultimately, this project should enable integrated localized crisis recovery and stabilization in eastern Ukraine.

## ACTIVITIES

stakeholder mobilization and assessment design

data collection

data analysis and dissemination of results

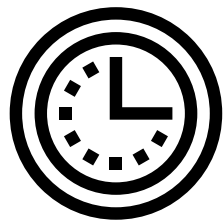

mapping of key infrastructure facilities and service providers

creation of tools for interactive data access and replication

developing of local language analytical products for each community based on the result of data collection

capacity development of local authorities and civil society for evidence-based planning

technical support to authorities on information management and geographic information system
